Fox 25 Small Free Standing Machine with Integral Extraction - Manual Blast Cabinet

The FOX 25 blast cabinets are very advanced in their design and have a number of excellent design features including integral dust extraction and foot pedal control. Fox cabinets have excellent visibility using fluorescent lighting and a large viewing window protected from abrasion by internal replaceable acetate sheets. In addition easy component handling can be achieved using turntable options and like the Jetair range the Fox 25 can easily be converted to pressure blast using a minipot, see Jetair information.

CABINET DIMENSIONS

- 815mm wide x 610mm deep x 760mm high
